

THYROID ULTRASOUND

Patient Sticker (or name) here

Date _____ Tech _____ Phone (____) - _____

Indication: Thyromegaly (Goiter), Palpable Mass R or L, Hyperthyroidism, Hypothyroidism, personal hx of neck radiation
 Hx Thyroid Cancer, personal hx multiple endocrine neoplasia (MEN), Other hx including surgical hx : _____

Prior Ultrasound : YES (when-what year) or NO (leave blank): _____

Prior thyroid biopsy : YES (when-what year) or NO (leave blank): _____

RIGHT LOBE: _____ (Length x AP x Width) **cm** Volume _____ mL

LEFT LOBE: _____ (Length x AP x Width) **cm** Volume _____ mL

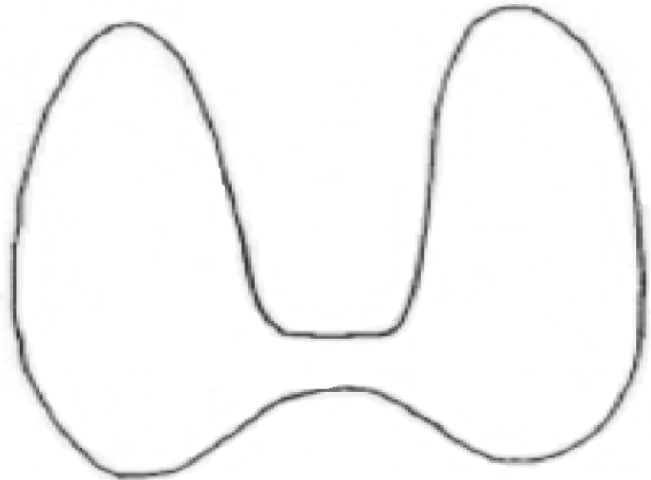

ISTHMUS: _____ cm (AP measurement)

NODULE(s): Estimated total number of nodules : _____ (or circle) 6-10, >10

Even if more than 4 nodules, draw up to 4 most suspicious: (suspicious features => solid, part solid, echogenic foci, taller than wide, margins lobulated or irregular, extrathyroidal extension): show on diagram, number nodule and show on table: Nodules with a greater number of suspicious features are more suspicious.

Tech comments:

Neck node survey: If none enlarged (> 1 cm in its shortest axis) or abnormal appearing (containing internal calcifications / cystic or other concerning feature) then nothing required in this box.

If the nodule has any of the characteristics listed on this table place a ✓ below the characteristic otherwise leave empty

Nodule (#) show on diagram Only 4 are diagramed unless there is doubt on most suspicious	Image numbers (showing where the nodule is seen, for example: image 23 or series 3, image 23) (include series numbers if more than one series, or sets of Images was done)	Measurements (L x AP x W)	Composition • mixed solid/cystic • Solid • mostly solid • indeterminate due to calcification	Echogenicity • Hypoechoic • Very hypoechoic	Shape Taller Than Wide (AP > W)	Margins • Lobulated • Irregular • Extrathyroidal extension	Echogenic Foci • Micro • Macro • Peripheral • Punctate
