#### <u>UPPER EXTREMITY VENOUS (UEV)</u>

## **Patient Prep:**

• None.

#### **Survey:**

- Perform a real time survey of the Upper Extremity Venous System with attention to Internal Jugular Vein, Subclavian Vein, Axillary Vein, Brachial Vein, Basilic Vein and Cephalic Vein.
- The forearm should be scanned and documented on worksheet if: Patient is symptomatic at the antecubital fossa and/or forearm and/or if there is thrombus in the upper arm (above the antecubital fossa) extending beyond the antecubital fossa.
- Limitations with images should be documented.

## **Image Documentation:**

• Each image must be labeled with the patient's full name, medical record number, accession number, initials of the imaging technologist, organ/area identification, scanning plane and patient orientation if different from supine.

## **General Procedure Description:**

- 1. If the exam is ordered unilateral the contralateral Subclavian Vein must be evaluated.
- 2. The patient needs to be in the supine position. The head can be slightly elevated.
- 3. The Right (RT) or Left (LT) side needs to be documented on each image.
- 4. The flow of the venous waveform needs to be evaluated for spontaneity and phasicity as needed.
- 5. The venous system will be evaluated for augmentation as needed. The image will need to have the word augmentation (aug) on the image.
- 6. The venous system will be evaluated for compression. The image will need to have the word compression (comp) on the image.
- 7. If the vessel is abnormal the correct labeling needs to be on the image.

#### **VENOUS SYSTEM**

- 1. Longitudinal Color images:
  - a. Internal Jugular Vein
  - b. Subclavian Vein (Proximal, Mid and Distal)
  - c. Axillary Vein
- 2. Longitudinal Color images with Spectral Doppler Waveform and Augmentation
  - a. Internal Jugular Vein
  - b. Subclavian Vein (Proximal, Mid and Distal)
  - c. Axillary Vein

- 3. Transverse Compression with grayscale (utilize dual screen with non-compression one side and compression the other screen.
  - a. Internal Jugular Vein
  - b. Subclavian Vein (Proximal, Mid and Distal)
  - c. Axillary Vein
  - d. Brachial Vein (Proximal, Mid and Distal)
  - e. Basilic Vein (Proximal, Mid and Distal)
  - f. Cephalic Vein (Proximal, Mid and Distal)

# **WORKSHEET**

- Information to place in box on worksheet.
  - o N=Normal
  - o A=Abnormal
  - o P= Partial Compression
